

To view transferred data according to target IP addresses, enter the Internet bandwidth monitor in the section *Presentation and Evaluation* -> *Presentation* -> *Internet bandwidth monitor*, select the customer, for whom you want to display the overview, using the upper filter. In the left part, you'll see the whole network topology including all specific devices. If you want to view the overview of transferred data according to IP addresses for a specific PC, then click on this PC in the topology on the left side, which will automatically open a new window, in which there's a tab Details of PC transfer, in which you can click on the link to view *Overview of IP addresses*, as you can see on the next image.

The screenshot shows the 'Details of PC transfer' window for PC NAWPC04. The window has several tabs: 'Prenosová rýchlosť', 'Prenesené dáta', 'Detaily prenosu PC', and 'O počítači'. The 'Detaily prenosu PC' tab is active, showing a table of IP addresses and their corresponding data transfer statistics. The table has columns for 'IP adresa', 'Total', 'Download', 'Upload', 'Port #', 'Download/Upload', and 'Port #'. The data is filtered for the period from 04.09.2012 12:51:03 to 06.09.2012 13:21:03. Red annotations highlight the 'Internet bandwidth monitor' link in the left sidebar, the 'Details of PC transfer' tab, the date range filter, and the 'Export to Excel' button.

IP adresa	Total	Download	Upload	Port #	Download/Upload
