Offers a detailed list of transfers through your selected ports. Using the filter on right side of the window, choose the required parameters such as nework, which you're monitoring, time interval, ports, type of graph, and select show in table or graph.

List of ports to data transfers is located on several places, one of them is the section breakdown of data transfers according to IP addresses [1].

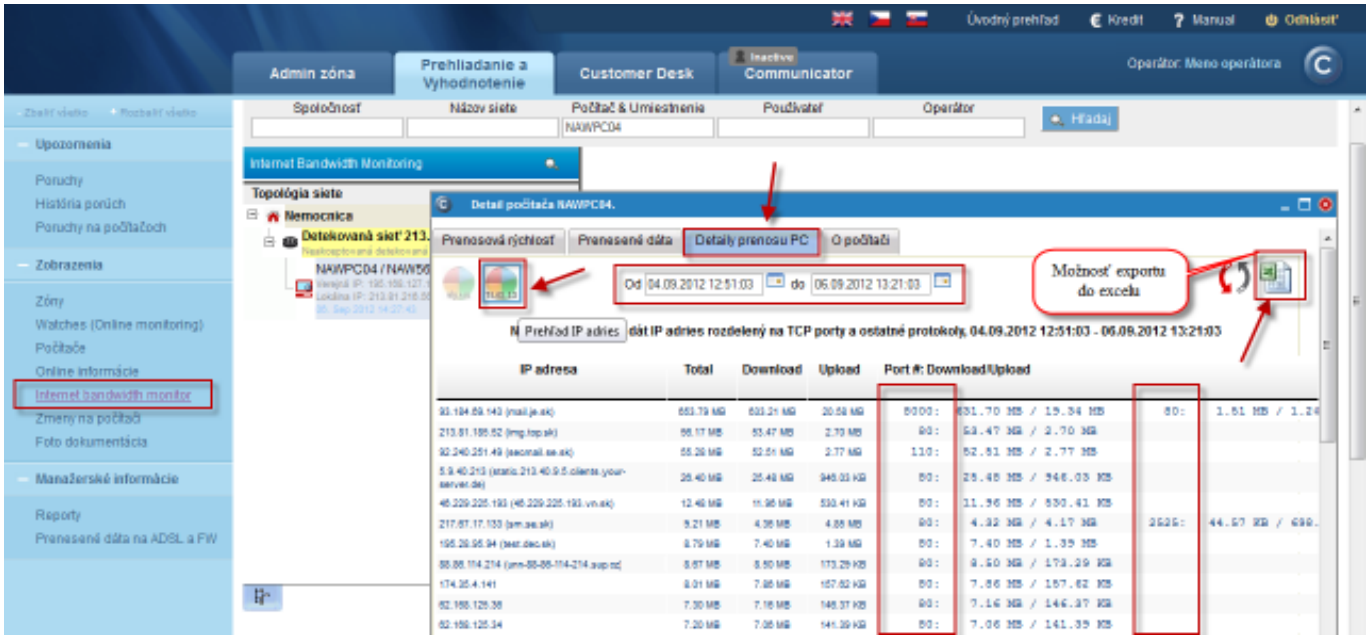

Image: Zobrazenie portov v rozpise dátových prenosov podľa IP adries

The ports are next displayed in the section breakdown of data transfers according to applications [2].

The information about ports is also in the export to excel.

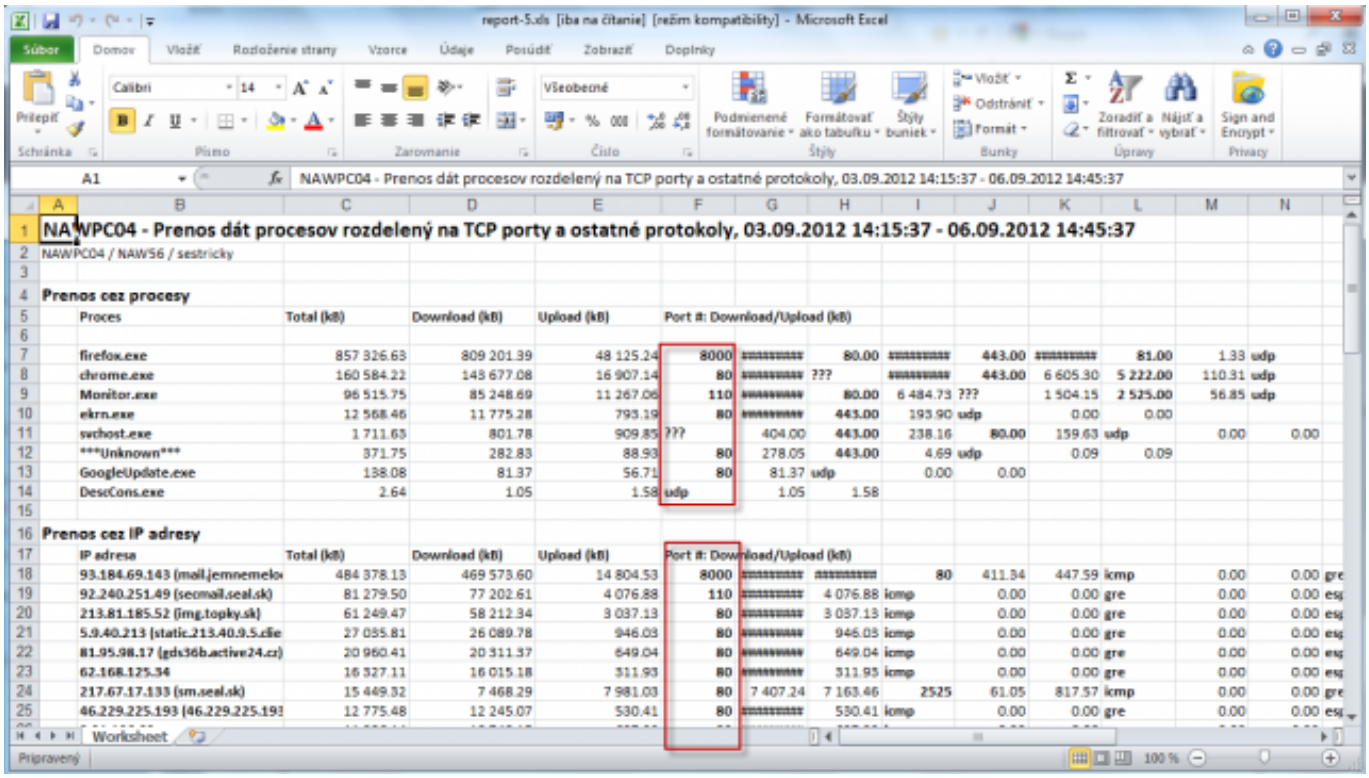

Image: Export zobrazenia prenesených dát spolu s portami

View of ports for a specific network or a device is easily generated through reports. Reports are located at *IBM -> Reports*, and are displayed on the next image.
