## Overview of the functions of individual CM components

CM Monitoring [1] - monitoring of IT sources and environment even in real time, or intervals as needed

CM Connection Guard [2] - server down detection

CM Backup [3] - backup of files, image disks for MS Windows, VMware, MS Hyper-V

<u>CM Computer Diagnostic</u> [4] - support at determining of HW and system failure of computers

CM Remote Operations [5] - access computers remotely, control and perform various functions

CM Maintenance Tasks [6] - regular maintenance, specific tasks to maintain the environment

CM Audit SW [7] - overview in software licenses

CM Inventory HW [8] - hardware database, including workers and other objects to register

CM NTFS Permissions [9] - access authorization in NTFS disks and shares under control

CM Reports [10] - reports from CM at every step

<u>CM IT Provider customizer</u> [11] - design the CM environment with your logos, access the CM portal from your domain (custom internet address)

CM External connector [12] - link CM with your solution - portal or a web solution

<u>C-Monitor Remote Installation</u> [13] - remote installation of the C-Monitor client in large networks Date:
